

RAGFlow ausprobieren

<https://ragflow.io>

“resume-en.txt” darf nicht geparkt werden. Grundsätzlich ist ein Dateiname, der ein “-” enthält, nicht akzeptabel. Er muss in “resume.txt” umbenannt werden.

Ich habe das Produkt getestet, und es hat sehr gut funktioniert.

The screenshot shows the RAGFlow web application interface. At the top, there's a navigation bar with 'Knowledge Base', 'Chat', 'Search', 'Agent', and 'File Management' tabs. The user is logged in as 'izwjjava'. The main content area is titled 'Knowledge Base / Dataset'. On the left, there's a sidebar with 'Dataset', 'Retrieval testing', and 'Configuration' options. The 'Dataset' section is active, showing a message: 'Please wait for your file to finish parsing before starting an AI-powered chat.' Below this, there's a table of datasets. The table has columns: Name, Date, Chunk Method, Enable, Parsing Status, and Action. A single dataset named 'resume.txt' is listed with a date of '2025 01:05:44', a 'General' chunk method, and a 'SUCCESS' parsing status. The page also includes a search bar, a 'Bulk' dropdown, and a 'Total 1' indicator.

Name	Date	Chunk Method	Enable	Parsing Status	Action
resume.txt	2025 01:05:44	General	<input checked="" type="checkbox"/>	SUCCESS	Refresh Edit Delete Download
