

Probando RAGFlow

<https://ragflow.io>

No se permite analizar “resume-en.txt”. Básicamente, los nombres de archivo que contienen “-” no son aceptables. Es necesario renombrarlo a “resume.txt”.

Probé el producto y funcionó muy bien.

The screenshot displays the RAGFlow web application interface. At the top, there's a navigation bar with the RAGFlow logo, a 'Knowledge Base' button, and links for 'Chat', 'Search', 'Agent', and 'File Management'. The user is logged in as 'Izwjava'. The main content area is titled 'Knowledge Base / Dataset'. On the left, there's a sidebar with 'Dataset', 'Retrieval testing', and 'Configuration' options. The main area shows a dataset named 'resume.txt' with a parsing status of 'SUCCESS'. A table lists the dataset details:

Name	Created Date	Chunk Method	Enable	Parsing Status	Action
resume.txt	2025 01:05:44	General	<input checked="" type="checkbox"/>	SUCCESS	Refresh Edit Delete Download

At the bottom right, there's a pagination bar showing 'Total 1' and '1 / page'.
