

Daily Life Tips

- I do not need to wear slippers in the winter; wearing socks is fine.
- Separate different kinds of rubbish and consider the temperature. For kitchen waste, food scraps, or used toilet paper, I probably need to throw them out often. However, for bottles or delivery boxes, you may be able to clean them and store them for a while. In the summer, I will need to dispose of rubbish more frequently.
- Buying clothes against the trend is cheaper. Waiting half a year to wear them is not a big deal.
- Using a dryer for 10 minutes can make clothes more comfortable.
- Focus on my task and leave things where they are. It may seem unorganized to others, but it's convenient for me.
- Using an iPhone 20w charger to charge a Mac M2 is acceptable.
