The screenshot shows the Scale Studio interface. On the left, there's a sidebar with options like Studio Dashboard, [Sample] Image Annotation Project, Definition (which is selected), Batches, Quality Lab (with a blue notification badge), Labeler Management, and Data. The main area has tabs for Task Setup (General Image Annotation) and Task Instructions (Edit instructions). Under Labels, there are two tabs: Visual (selected) and JSON, with a '+ Add label' button. A list of labels includes Couch, Chair, Throw Pillow, Table, Ottoman, Table Type, and Color. To the right, a detailed view for the 'Chair' label is shown. It includes an Overview tab (selected), Box Attributes (Min height: 10, Min width: 10, Can rotate: checked, Integer pixels: checked), and a list of all annotations: Couch (0), Chair (0), Throw Pillow (0), Table (0), and Ottoman (0). There are also buttons for Update tasks, Update preview, and Save.
