

嘗試 RAGFlow

<https://ragflow.io>

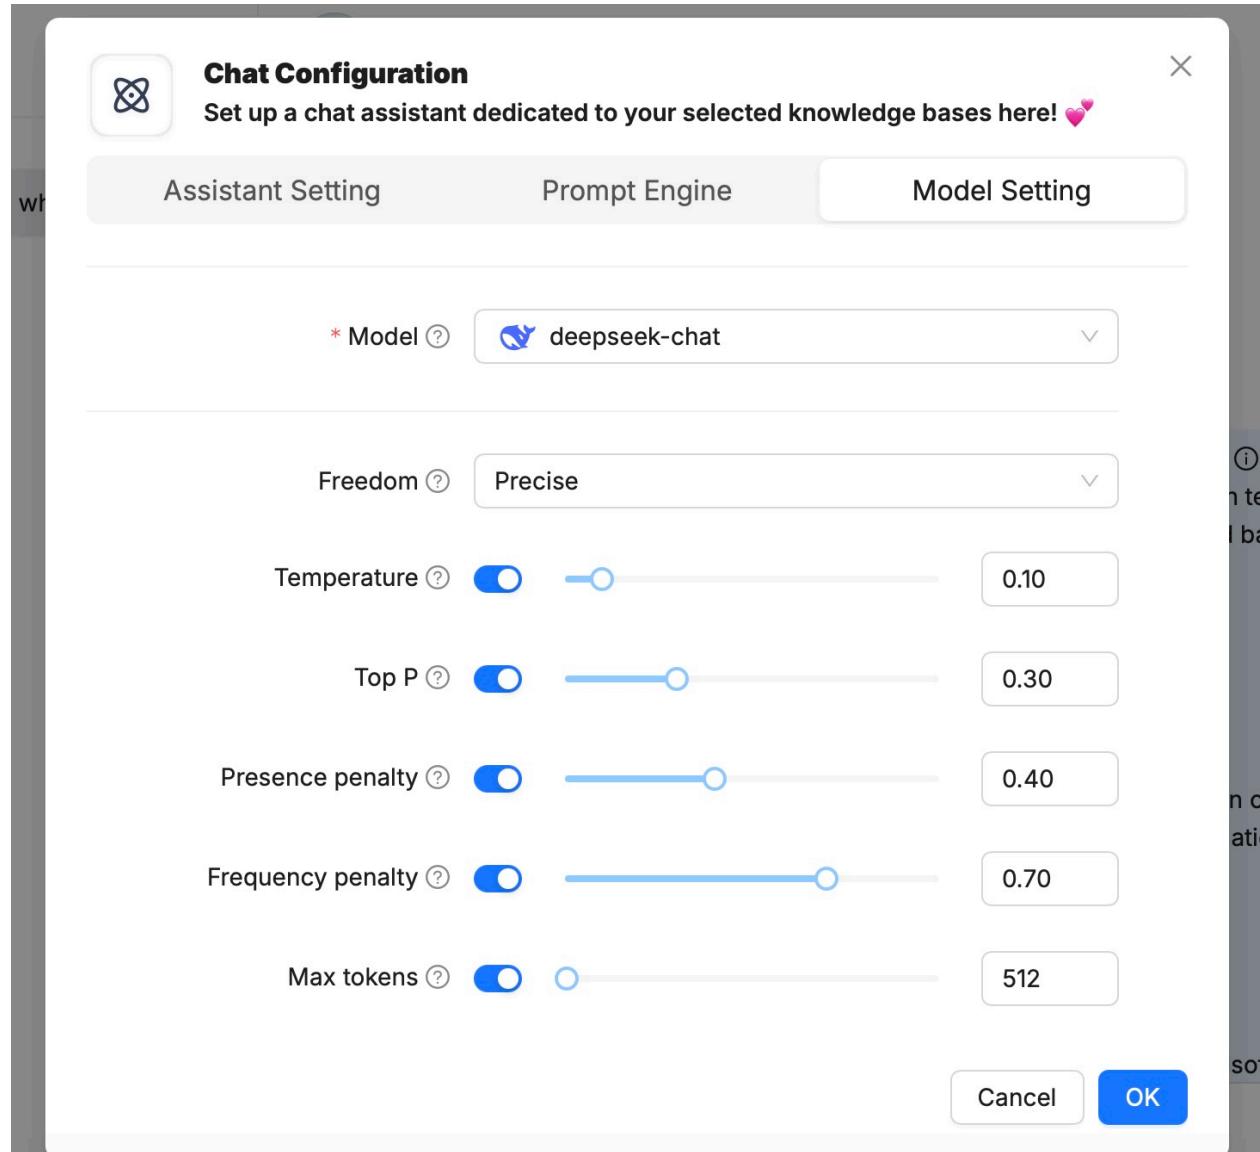

“resume-en.txt” 這個檔案名稱不被允許解析。基本上，包含 “-” 的檔案名稱是不可接受的。需要將其重新命名為 “resume.txt” 。

我測試了這個產品，它的表現非常出色。

The screenshot shows the RAGFlow web application interface. At the top, there is a navigation bar with tabs for Knowledge Base, Chat, Search, Agent, and File Management. The Knowledge Base tab is selected. On the left, there is a sidebar with three options: Dataset (selected), Retrieval testing, and Configuration. The main content area is titled "Knowledge Base / Dataset". It displays a "Dataset" section with a message: "Please wait for your file to finish parsing before starting an AI-powered chat." Below this, there is a table titled "Dataset" with columns: Name, Date, Chunk Method, Enable, Parsing Status, and Action. A single row is shown for a file named "resume.txt" with the following details: Name: resume.txt, Date: 2025 01:05:44, Chunk Method: General, Enable: On, Parsing Status: SUCCESS, and Action: a green circular icon with a checkmark. At the bottom right, there are pagination controls showing "Total 1" and "10 / page".
