

# 阿里云弹性 IP 管理

该脚本提供了一个命令行界面来管理阿里云弹性公网 IP (EIP)。它允许你使用阿里云 Python SDK 来创建、绑定、解绑和释放 EIP。该脚本接受要执行的任务和 EIP 的分配 ID 作为参数。

```
python aliyun_elastic_ip_manager.py unbind --allocation_id eip-j6c2olvs7jk9142iaaa
python aliyun_elastic_ip_manager.py bind --allocation_id eip-j6c7mhenamvy6zao3haaa
python aliyun_elastic_ip_manager.py release --allocation_id eip-j6c2olvs7jk9142aaa
python aliyun_elastic_ip_manager.py describe
```

```
# -*- coding: utf-8 -*-
```

```
# 此文件是自动生成的，请勿编辑。谢谢。
```

```
